

ISO 15189
ACCREDITATION FOR
MEDICAL LABORATORIES
MEDICAL LABORATORIES

WHAT IS ISO 15189?

"ISO 15189:2012 specifies requirements for quality and competence in medical laboratories. ISO 15189 can be used by medical laboratories in developing their quality management systems and assessing their own competence. It can also be used for confirming or recognizing the competence of medical laboratories by laboratory customers, regulating authorities and accreditation bodies."

While the standard is based on ISO/IEC 17025 and ISO 9001, it is a unique document that takes into consideration the specific requirements of the medical environment and the importance of the medical laboratory to patient care.

Providing ISO 15189 Consulting And Training Services Across The World.

BENEFITS OF ISO 15189

1. National & International Recognition.
2. Recognizes The Technical Competence Of Laboratory Staff.
3. Assures The Client That Results Are Technically Valid.
4. Provides Comparability In Measurements.
5. Decision Makers Can Rely On Test Result.
6. Improves Staff Motivation.
7. Ensures Better Support In The Event Of Legal Challenge.
8. To Assist In The Development Of New Programmes.
9. To Reduce Technical Barriers In Trade.
10. Saves Money By Getting It Right First Time.

What does Sterling International Consulting Offers in the field of ISO 15189 MEDICAL LABORATORIES?

The medical laboratory quality management professionals at Sterling, have considerable experience helping our clients to design and implement ISO 15189 Medical laboratory. In addition to planning, development, and implementation, we help our clients cooperatively work with ISO 15189 accreditation organizations - National Accreditation Board for Laboratories.

Sterling offers comprehensive services that will help you achieve your ISO 15189 quality goals. We can:

- Conduct an initial gap analysis
- Help you establish policies and objectives.
- Identify documentation requirements
- Coordinate document preparation, reviews, approvals, and issuance.
- Manage implementation schedules, training, follow-up actions
- Help you select a Registrar that has experience in your industry and achieve successful accreditation.

Sterling International Consulting:- 202, Gym Building, Khalid Bin Waleed Street, Bur Dubai, PO BOX 27363, Dubai, UAE

Phone: +971 4455 8677, Mobile: +971 5058 42597 | Fax: +971 4455 8556 Web: www.uaeiso.com | Email: info@uaeiso.com

• U.S.A • UK • SINGAPORE • INDIA • UAE • KSA • EUROPE • AFRICA • AUSTRALIA • HONG KONG

In Addition To Consulting (onsite And Online), We Provide Following Training

- "ISO 15189 Overview Training"
- "ISO 15189 for the Small Laboratory"
- "Developing Your Laboratory Quality System Documentation"
- "Internal Auditor training"
- "Estimation of Measurement Uncertainty"
- "ISO 15189 implementation training"

GENERAL REQUIREMENTS FOR THE ISO 15189

Quality system requires implementation of two sets of requirements/standards and activities.

The essential components are :

- Management requirements [Clause 4]
- Technical requirements [Clause 5]

MANAGEMENT REQUIREMENTS

- 4.1: Organisation and Management
- 4.2: Quality Management System
- 4.3: Document Control
- 4.4: Review of Contracts
- 4.5: Examination by Referral Laboratories
- 4.6: External Services and Supplies
- 4.7: Advisory Services
- 4.8: Resolution of Complaints
- 4.9: Identification and Control of Nonconformities
- 4.10: Corrective Action
- 4.11: Preventive Action
- 4.12: Continual Improvement
- 4.13: Quality and Technical Records
- 4.14: Internal Audits
- 4.15: Management Review

TECHNICAL REQUIREMENTS

- 5.1. Personnel
- 5.2. Accommodation and environmental conditions
- 5.3. Lab equipment
- 5.4. Pre-examination procedures
- 5.5. Examination procedures
- 5.6. Assuring quality of examination procedures
- 5.7. Post-examination procedures
- 5.8. Reporting of results

Measurement of uncertainty is a requirement of the ISO/IEC 15189 standard. When estimating the uncertainty of measurement , all uncertainty components which are of importance given situation shall be taken into account:

1. Reference stds. and reference materials with reported uncertainty in the calibration certificate.
2. Method employed.
3. Equipment used with reported uncertainty in the calibration certificate.
4. Environmental conditions.
5. Properties and condition of the item being tested/calibrated.

INTERLABORATORY TEST PROGRAM/ PROFICIENCY TESTING & METHOD VALIDATION

It is one of the powerful methods of checking the validity of the test and / or calibration results.

All NABL accredited testing and calibration laboratories are required to participate in proficiency testing programmes conducted by NABL or the nodal organizations appointed by NABL.

Key Steps Towards Accreditation Are:

ISO 15189 accreditation should be well thought out and well prepared. It can be quite expensive but can also have big benefits. The balance between costs and benefits should be worked out and documented.

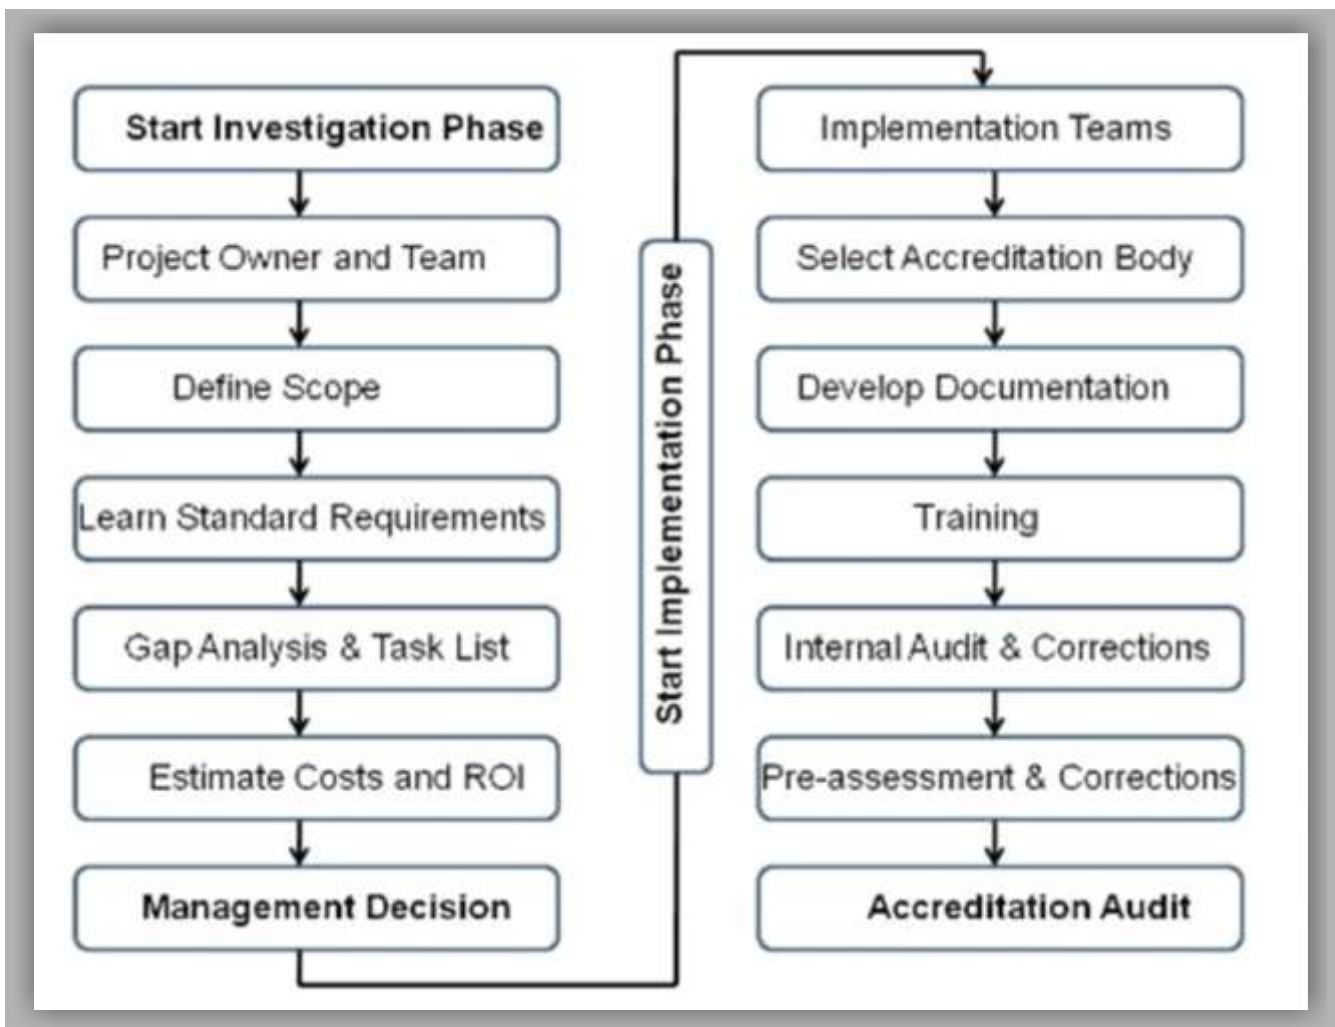

Going for ISO 15189 will impact the entire laboratory and supporting services such as human resources, documentation and finance departments. Therefore, while the decision to initiate and fund the project will be made by management, all affected departments should be involved in the process.

The entire process is divided into two phases: Investigation phase and implementation phase. In the investigation phase information is collected to decide if going for accreditation makes business sense. Once the decision is made the laboratory develops and implements documentation in preparation for the accreditation assessment.

Documentation

ISO/IEC requires different types of documentation as illustrated in the documentation pyramid below.

What kind of documentation ISO 15189 requires ?

- ❖ A policy documents the laboratory intent and goal of the laboratory to conform to ISO /IEC requirements.
- ❖ Quality manual describes the approaches to achieve quality data. It includes quality policy.
- ❖ A process describes how various quality requirements can be achieved.
- ❖ Standard operating procedures or working procedures are step by step instructions on how to exactly perform a specific task.
- ❖ Records are generated on day by day basis.
- ❖ All records should be well controlled.

With a team of highly qualified consultants and trainers having vast industrial experience, we partner organizations across the world to implement and achieve ISO / IEC 15189/ Accreditation. Our consulting approach is highly professional, time bound and effective resulting in ease of implementation and adds value to the business processes of the client organization.

Contact us at info@uaeiso.com to get your organization ISO / IEC 15189 Accredited.
